

High quality EMI shielding
 Conductive Foil Tapes

DESCRIPTION

SSDP Conductive Foil Tapes consist of Copper/Aluminium foil backed with pressure sensitive conductive adhesive. SSDP Conductive Foil Tapes are available in various widths and are supplied in rolls.

APPLICATION

SSDP Conductive Foil Tapes are ideal for:

- Sealing seams of EMI shielded rooms, electronic enclosures
- Electro static discharge
- Grounding
- Shielding of cables by wrapping

TECHNICAL SPECIFICATION:

Parameter	Specification
Foil	Copper/Aluminium
Thickness	0.05mm
Interliner	Polyethylene Coated Paper
Adhesive	Electrically Conductive (Pressure Sensitive)
Peel off Strength	40 oz/inch (Copper) 35 oz/inch (Aluminium)
Tensile Strength	35lb/inch (Copper) 20lb/inch (Aluminium)
Conductivity	< 0.01 ohm/sq.inch
Shielding Effectiveness	>60dB (Copper) >55dB (Aluminium)
Temperature Range (°C)	-55°C to +155°C
